- Civil / structural engineering
- Instrumentation & controls engineering
- Project engineering
- Design & drafting
- Procurement
- Commissioning support
- Project as-builts

Schedule: Ongoing

Contract Type: Reimbursable

Federation Engineering has been retained to assist Strathcona with project development for a portfolio of sustaining capital and production expansion projects at their Orion SAGD facility since 2018. These projects are located throughout the plant and offsite areas, requiring all disciplines of engineering and supporting project services such as estimating, scheduling, procurement, and project controls. The Federation Engineering team works closely with the Strathcona Facilities Engineering team to identify and implement continuous improvement opportunities throughout the program of work.
